

Pay-Per-Scan

Do you love podium but don't like leasing or the full purchase cost? No problem, you can now have a podium to use in your clinic and simply pay when you use podium.

Tell me more!

Under the pay-per-scan scheme you pay us £10 for each scan you take. You are welcome to charge as much as you like to your patients. We even help you advertise and sell scans to your patients.

You receive the same equipment, portal access and training as someone who has bought or leased a podium but you will not own your unit and can return it to us at the end of your contract term.

Similar to our other schemes there is a monthly software and maintenance charge of £75.

The scheme costs just £499 to join and you can choose to remain on it as long as you like after 12 months.

Will it work for me?

The average price paid by patients per scan is £30*.

With just 1 scan per day you would be making **£325** per month after deducting the scan and maintenance costs.

After 2 months you would have returned your joining fee with **£151** profit!

** scan price range from £0 to £60 per scan within the podium customer research poll.*

Why £0? Some of our customers simply want to improve their services to patients and do not charge for Podium scanning. These people often opt for our direct or lease-purchase options.
